

CSC790: Deep Learning

Fall 2020, Project report format

Abstract:

- Briefly describe the problem, the method and the results.

Introduction and literature review:

- Provide more detailed description of the problem.
- Provide related work related to the problem you are solving. (at least 12 references)

Background:

- Introduce the tools you are using to solve the problem.

Methods:

- Describe the methods/procedures you used to solve the problem.

Results:

- Describe and analyse your results.

Conclusion:

- Summarize your work, results and future improvements

What did you learn:

- Each team member should describe what did she/he learned in this project.
